

Capabilities Sheet

Who and where we are:

Verdant is a small business based in Greater Cincinnati that provides lab instrument support to the Midwestern US. Services include instrument repair, maintenance, training, calibration and design, and Verdant offers 24-hour emergency services with affordable daily rates and service contracts.

There is a large demand for lab support that is never met – simply because it’s too expensive. Our goal is to help more work get done by making a wider range of support services affordable.

Why Verdant:

As a small business, we have a number of advantages:

- ✦ Significantly lower cost
- ✦ Faster response time when you need it most
- ✦ Higher quality, personal service
- ✦ Greater flexibility with arrangements

And we’re experts who are passionate about what we do:

- ✦ The owner has over 5 years of demonstrated leadership in the field of lab instrumentation
- ✦ We use the latest technology to provide time- and money-saving solutions that few other companies can offer
- ✦ We publish a regular bulletin that alerts clients of industry trends and offers solutions to common issues
- ✦ Verdant developed the chemical recycling technology that won the [2015 ACS Green C&EN award](#)

 Veteran Owned Small Business

“I love dealing with Verdant because the owner is honest and they really know their stuff. They always know exactly what’s wrong even when it’s not obvious.”

Melanie Couch
 Western KY Regional USDA Lab

“Whenever something stops working right, I call Verdant because they can fix any problem, even when it’s something that other companies have told me I just have to live with.”

Jen Iulig
 NKU Lab Manager

How we can help:

Maintenance & Support NAICS: 811219	Engineering Services NAICS: 541330	Fabrication NAICS: 334516/333314
Prevention, Training & Maint. Validation & Qualification Repairs & Calibrations	Equipment Interfacing Instrument Design Problem Solving	Rapid Prototyping Instrument Modification Process Automation

What we can help with:

GC & GC/MS TGA/DTA UV/Vis Spectrometers Combustion Analyzers Many more - including obscure, custom-made, or aging instruments	HPLC & LC/MS DSC IR/FTIR Spectrometers Pipettes	ICP & ICP/MS Microscopy Balances PCR Thermal Cyclers
